VICASTOL FFG

A Lightfast fatliquoring agent for all types of soft & white leather

CHARACTERISTICS:

Chemical Composition	:	Blend of synthetic oil and softeners by special method.
Aspect	:	Brown liquid.
Active Matter	:	50% ± 2
pH Value (10% Soln)	:	8.0-9.0
Stability	:	Stable to neutral salts, bases, acids and chrome salts at usual concentration. Normally used in tanneries.
Storage Stability	:	Due to its natural properties, VICASTOL FFG has tendency to become viscous at lower temperatures. However it does not effect the applications properties. 9-12 months when properly stored .

PROPERTIES & APPLICATION:

VICASTOL FFG has versatile utility and its surface touch make it highly recommended for a wide range of light coloured leather such as beige, pastel and white leather.

VICASTOL FFG gives very good inner softness with pleasant silky touch. Due to excellent lightfast property it does not change the shade of the leather.

VICASTOL FFG has highly bleaching property, hence it is much suitable for all type of pastel and white leathers.

VICASTOL FFG can be used 2-10% alone, however it does not give any greasy surface.

The above results have been obtain from trials in our laboratory and plant in the light of changing conditions, they can serve only as a guide and are therefore offered without obligation.
