

**A anionic lightweight and lightfast synthetic fatliquor for upholstery, garment Upper and Nappa type leather articles****CHARACTERISTICS:**

Chemical Composition	:	A sulphonated aliphatic ester and polymeric softeners combined with a functional substitute of natural ester
Aspect	:	A light brown coloured clear liquid
Active Matter	:	65% ± 2
pH(10% emulsion)	:	7.5 - 8.5
Stability	:	The product is stable to acid, alkali, chrome and hard water
Storage Stability	:	At least 6 months if properly stored. Under shade and at room temperature

PROPERTIES & APPLICATION:

VICASTOL VFB/W has a wonderful characteristic property on leather, it softens the fiber without loosening if any extra dosage goes into the leather.

VICASTOL VFB/W gives very inner softness with good body and round feel with smooth grain surface and silky touch.

VICASTOL VFB/W is a highly penetrative fatliquor, capable of dispersing other fatliquors and retanning agents also.

VICASTOL VFB/W has excellent lightweight and light fastness property, so it is specially recommended for light coloured and pastel shades leathers.

VICASTOL VFB/W can be used 1-6% on shaved weight depending upon the type of leather to be produced and result required.

The above results have been obtain from trials in our laboratory and plant in the light of changing conditions, they can serve only as a guide and are therefore offered without obligation.
